

**To whom so ever it may Concern**

This is to certify that Clusterstone is a lightweight concrete façade with a super-hard outer shell designed to replicate natural stone to be used on exterior and interior walls. Because of lightweight composition it does not require additional footings.

**Technical Data:**

TEST PARAMETERS	RESULT
Compressive Strength in N/mm <sup>2</sup>	Avg. 22.50 N/mm <sup>2</sup>
Water absorption in % by mass	Avg. 05.08%
Flexural strength in N/mm <sup>2</sup>	Avg. 2.15 N/mm <sup>2</sup>
Abraison	Avg. 0.012 mm
Fire resistant test at 650°c	Satisfactory, No sign of fire Damage on stone
Density in Kg/m <sup>3</sup> Size: 55×55×65. Wt. 260.0G	1322 Kg/m <sup>3</sup>

**NOTE:**

- Flexstone provides warranty i.e. Clusterstone will not detach from the wall due to any weather conditions except any natural calamity.
- In case, if the wall is not properly scrapped or if any cracks develop on the surface of wall, there are chances to develop that crack on Clusterstone.
