## Decorative Stamp Concrete Floors

FlexStone®

# About DSCF

**Decorative Stamp Concrete Floor is an attractive alternative to natural paving materials or plain poured concrete.**

**Stamped concrete, also referred to as imprinted concrete, textured or embossed concrete, is concrete that has been made to look like another material such as rock, cobblestone, tile, slate, brick or wood.**

**Stamped concrete has been around for many decades and is found on driveways, pool decks, entryways, patios, courtyards, and walkways, both commercial and residential properties. FlexStone takes this proven technology one step ahead with its 5 step methodology, which enhances the aesthetic look of the floor with its unique shadow impact technique.**

**Decorative Stamp Concrete Floor is created by using a super strong concrete mix which is then stamped with specialized textured mats to create a surface texture that resembles natural stone, brick, paving or any other of countless variations.**

**Decorative Stamp Concrete floor is non-porous, impermeable surface, which means that weeds can't grow through it and that stains such as oil can be easily cleaned off. The colors are 100% UV and do not fade away as a result of direct sunlight.**

# Ashlar Stone

**NO. ITB-007 (61 × 61 cm)**

# European Fan Stone

**NO. ITB-003 (66 × 117 cm)**

# Garden Stone

**NO. ITB-001 (106 × 106 cm)**
